Benefits of getting the Covid-19 vaccine

- While getting COVID-19 may offer some natural protection or immunity, the risk of severe illness and death from COVID-19 far outweighs any benefits of natural immunity. Getting a COVID-19 vaccine will help protect you without having to be sick. Learn about the benefits of COVID-19 vaccination so you'll be ready when a vaccine is recommended for you: https://www.cdc.gov/coronavirus/2019-ncov/vaccines/about-vaccines/vaccine-benefits.html
- Your best protection from COVID-19 will be a combination of getting a COVID-19 vaccine, wearing a mask, staying at least 6 feet away from others, avoiding crowds, and washing your hands often. No one tool alone is going to stop the pandemic. Learn about the benefits of COVID-19 vaccination so you'll be ready when a vaccine is recommended: https://www.cdc.gov/coronavirus/2019-ncov/vaccines/about-vaccines/vaccine-benefits.html
- FACT: #COVID19 vaccination helps keep you from getting COVID-19.
  The vaccines currently available in the United States are more than 90% effective at preventing COVID-19, according to clinical trials, and are important tools to stop the pandemic.

What are the benefits of getting vaccinated?

The COVID-19 vaccines produce protection against the disease, as a result of developing an immune response to the SARS-Cov-2 virus. Developing immunity through vaccination means there is a reduced risk of developing the illness and its consequences. This immunity helps you fight the virus if exposed. Getting vaccinated may also protect people around you, because if you are protected from getting infected and from disease, you are less likely to infect someone else. This is particularly important to protect people at increased risk for severe illness from COVID-19, such as healthcare providers, older or elderly adults, and people with other medical conditions.
